

EasyWallSystem - installation glue

WALL FINISHING SYSTEM

Product number: 661-A0071

The EasyWallSystem wall finishing system is a way to quickly and easily renovate or finish the interior. You no longer have to worry about booking a tiler's work date, you do not have to add the cost of instalator work to the renovation budget - now the easiest way is to purchase the EasyWallSystem. The glue is used to install the chosen acrylic sheet to the wall! The features of the system are: • Installation without preparing the existing walls - Installation on old tiles or directly on unbreakable walls • Quick installation without drilling depending on the condition of the substrate: glue fixing • Economical solution suitable for all configurations • Renovation sheets and profiles can be easily cut to suit specific configurations, • adjusting to the required size in the comfort of your home - quickly and without any problems while maintaining an appropriate order at the workplace • Profiles in the silver gloss colour Now you can choose the number of necessary profiles, connect with the chosen acrylic sheets and prepare the construction according to your needs! Corner, wall-mounted, or maybe the entire room? Now it is possible!
