

Shower tray BP-M/SPACE 100x100x1,5 kr

HALF-ROUND SHOWER TRAY

Product number: 645-290-0440-53-000

The half-round shower tray saves bathroom space due to the corner installation. BP-M/Space shower tray from Space Mineral series is a product with depth of 1.5 cm and it is completed with a siphon with a cover plate. White shower trays are completed with a cover in the same color, while other colors are designed with chrome cover. Half-round shower trays in the Space Mineral series are the perfect complement to any shower enclosure in this shape. Thanks to the material which they are made of, they are characterized by excellent functional properties and aesthetic values. Shower trays made of mineral cast have an extremely smooth non-porous surface. Keeping them clean does not require much effort. Their advantage is resistance to chemicals and staining. The small height makes it possible to position the shower tray both on floor and into floor with it, providing a barrier-free entrance. What is more, the material from which they were made of is resistant to abrasion, thanks to which they retain their original appearance for a long time. Space Mineral shower trays can be optionally equipped with the anti-slip ProSafeSystem surface, which is characterized by the highest anti-slip C class. All these features make this solution work well for even the most demanding customers, for whom safety and quality of products are uncompromising.
