2 in 1 - bathtub screens

Our bathtub screens have been made with particular attention to the form and details. Their diverse designs helps match the product to each bathroom arrangement. We want to give the client a non-intrusive product what allows you to create the perfect bathing space.

Advantages

The bathtub screen is a practical solution that is perfect especially for small bathrooms. It is an almost perfect product. It allows you to meet the needs of bathing and showering funs.

Bathtub and shower enclosure installed in one bathroom, can be impossible for many users. The bathtub screen is yours a kind of compromise that gives us a lot of freedom in further arranging the space. The different designs of screens allow you to choose the best way to create your bathing area. We offer one-element fixed or two-moveable elements bathtub screens from the Free Line or Free Line II series, one-element movable from the Prestige III series and bathtub screens with sliding doors in the TX5 series, which can be combined with fixed wall and create the corner bathtub screen construction. Their main rule is to protect the bathroom against water splashing. An additional advantage of bathtub screens is their easy installation. It consists above all on attaching profiles or hinges to the wall, installing walls or doors and proper product leveling. Accurate installation ensures trouble-free use.
