Individual orders

Bathroom arrangement is a process in which aesthetic issues often depend on the available space of the bathroom. Sanplast goes beyond these limits. We open the space to the individual needs of each user, not forgetting about high quality products. Given the diversity of customer needs concern the selection of perfect sanitary equipment, we have created shower enclosures that we are able to adjust for almost every bathroom. Individual shower enclosures program provides custom solutions in the context of bathroom arrangements. It is also a

great way to create creative use of unfavorable spatial arrangements in rooms, to easily and originally arrange a bathing room. The technical possibilities of production of shower enclosures can be found on the website www.sanplast.pl and in the Customer Service Department. Wide range and easy to choose the cabin according to individual needs will make the bathing room become a true bathing pleasure.

The bathroom is an indispensable place in any home and also in any public place, such as a hotel or guesthouse. However, its furnishing is.

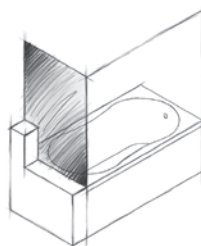

Square shower enclosures

The drawings illustrate the possibility of altering the overall dimensions, fitting the additional wall and making the chamfers, undercuts and cutouts.

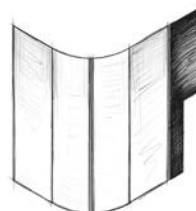

Bath screens

The drawings illustrate the possibility of changing the dimensions of the screens.

Quadrant shower enclosures

The drawings illustrate the possibility of adding an additional wall with a chamfer or undercut.

a great challenge for the designer, who must take into consideration the functionality of the elements used while maintaining the appropriate style. Reliability and modern technology of our production translates into the trust that our customers give us. This is evidenced even by the fact that the products signed by our brand can be found in such reputable networks as Doubletree by Hilton, Novotel, Ibis Style, Best

Western Hotels, Campanile and B & B. Bathroom solutions offered by us are also available at many reputable properties throughout Poland.

Glass Protect

Glass Protect is a glass surface modification system. Thanks to this maintenance of the shower enclosure clean is cheap and simple. For maintenance, gentle cleaning agents are sufficient, which is favourable to ecology.

Sanitary acrylic

Sanplast shower trays and bathtubs are made of high quality sanitary acrylic. The material has anti-skid properties, which guarantees safety of use. Sanitary acrylic products have a perfectly smooth surface, making cleaning extremely easy. Acryl is a material that is stained in the mass, so that scratches that may occur during use are easily removed by polishing. Thanks to its physical properties, the sanitary acrylic perfectly keeps the warm.

Mineral casts

Shower trays and washbasins made of mineral cast are characterized by excellent mechanical and chemical properties. Extremely smooth, non-porous surface facilitates the maintenance of cleanliness, eliminates the development of dangerous bacteria, which is especially important in rooms with high humidity. The undoubted advantage of mineral castings is the stain resistance and discoloration. Any dirt is easy to remove using gentle detergents. This material is extremely durable, resistant to abrasion, so that the shower trays retain their original appearance for a long period of time.

Pro Safe System

Pro Safe System is a special non-slip surface permanently spot applied to acrylic or mineral surface. It provides maximum safety and comfort of the bath. Aesthetic pattern with a delicate structure create a new visual effect in the bathroom. The coating is flat, so it easy to keep the shower tray clean. The bath becomes even more pleasant and safe for the user.

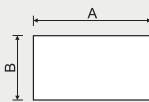

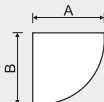

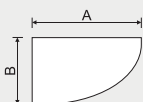

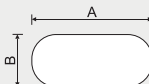

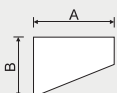

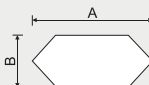

Safety classes

Safety of Sanplast products is a key element in the production process and product offering to the market. That is why Sanplast cares for each of its products have to meet stringent requirements in this issue. They are not only checked on individual stages of production by specialists working on them, but also by independent institutes and research organizations. One of the tests which Sanplast shower trays have undergone is a study conducted by a prestigious TÜV Rheinland Polska institute dealing with certification for enterprises from various branches of the economy.
